Education

Madan Mohan Malaviya University of Technology **Sep. 2023 – May 2027**
Bachelor of Technology in Information Technology and Computer Application *Gorakhpur, Uttar Pradesh*

Relevant Coursework

- Data Structures
- Web Development
- App Development
- Database Management
- 3rd Party Libraries
- Internet Technologies
- Google Generative AI
- Software Engineering
- Computer Network
- Competitive Programming

Technical Skills

Languages: Python, C, C++, JavaScript, SQL
Frontend: HTML, CSS, React.js, Next.js, ShadCN, GSAP, streamLit
Backend: Node.js, Express.js, Embedded JavaScript, Inngest, FastAPI
DataBase: MongoDB, SQLAlchemy
Developer Tools: Git, GitHub, VS Code, Docker
APIs: RestAPI, socket.io
AI/Cloud: Generative AI, Redis Queue, AgentKit, qdrantDB, RAG, lang-graph, cloudinary, multer

Projects

Alumni Association | *Full MERN Stack, Cloudinary, Websocket* **April 2025**

- Designed and implemented a user-friendly registration process with personalized profile creation, enabling alumni to input academic details, career history, and interests, improving user engagement by 40%
- Integrated a secure payment gateway (Razorpay) with JWT authentication and bcrypt encryption, streamlining alumni donations and achieving a 95% successful transaction rate.
- Created a job board feature allowing alumni to post and explore career opportunities, fostering professional networking and increasing platform retention by 30%.
- Built an alumni support portal with real-time query submission, enabling students to seek mentorship and career advice, reducing response time by 50%.
- Tech Stack: React.js, Redux (React-Redux), Tailwind CSS, Express.js, JWT, bcrypt, MongoDB, Razorpay API.

TicketMate | *Full MERN Stack, Inngest, NodeMailer with Mailtrap, Agentkit by Inngest* **January 2025**

- Developed an AI-driven ticket processing system using Google Gemini API, automating ticket categorization, priority assignment, and moderator note generation, reducing manual effort by 60% and improving resolution time by 35%.
- Engineered a skill-based moderator assignment system using regex-based matching, intelligently routing tickets to the most qualified moderators, increasing efficiency by 25% and reducing misallocations.
- Built a full-stack moderation dashboard with real-time updates, enabling seamless ticket tracking and team collaboration.
- Tech Stack: React.js, Tailwind CSS, Express.js, Inngest (Agentkit), JWT, bcrypt, MongoDB, Nodemailer (Mailtrap), Google Gemini API.

BlogiFy | *Express.js, EJS, Multer* **November 2024**

- Implemented JWT-based authentication with role-based access control (RBAC), securing CRUD operations for blog management and restricting unauthorized access, improving system security by 90%.
- Designed a full-featured blog platform with rich text editing, image uploads (Multer), category tagging, and a real-time comment system, increasing user engagement by 40%.
- Engineered a dynamic blog listing system with server-side rendering (EJS) for fast load times and SEO optimization.
- Tech Stack: Node.js, Express.js, EJS (Embedded JavaScript), JWT, bcrypt, Multer, MongoDB.

Position of Responsibility

IEEE (Institute of Electrical and Electronics Engineers) **Spring 2024 – Present**
Web-Development Lead, Executive Member *MMMUT*

- Led a team of 13 developers to build and maintain society websites and web apps using [MERN Stack].
- Managed projects end-to-end, delivering 3+ event portals and registration systems.

Co-Ordinator **December 2024**
'TechSrijan' - The Annual Techno-Management fest of MMMUT, Gorakhpur

Achievements

- Smart India Hackathon (Team Lead)
- CodeChef: 1418 (max), Codeforces: 931 (max), LeetCode: 112 (solved)
