Education

Madan Mohan Malaviya University of Technology **Sep. 2023 – May 2027**
Bachelor of Technology in Information Technology and Computer Application *Gorakhpur, Uttar Pradesh*

Experience

Mocklingo | *Software Development Intern* **Jul 2025 – Feb 2026**

- Built a full-stack AI mock interview platform using Next.js, FastAPI, and PostgreSQL with real-time voice sessions via Gemini Live API and WebSocket, serving 6,000+ users.
- ntegrated Razorpay payment gateway with webhook verification and implemented a tiered subscription system, enabling B2C monetization across 10,000+ interview sessions.
- Developed B2B organization management portal with role-based access control, bulk student onboarding via CSV, and org-level analytics dashboards.

Technical Skills

Languages: Python, C, C++, JavaScript, SQL
Frontend: HTML, CSS, React.js, Next.js, ShadCN, GSAP, Streamlit
Backend: Node.js, Express.js, Embedded JavaScript, Inngest, FastAPI
DataBase: MongoDB, PostgreSQL, SQLAlchemy
Developer Tools: Git, GitHub, VS Code, Docker
APIs: RestAPI, Socket.io
Generative AI: LangChain ,LangGraph, RAG, AgentKit, QdrantDB, Gemini API, Live API, Neo4j, mem0, ollama
Cloud Storage: Cloudinary, Redis, Docker

Projects

Alumni Association | *Full MERN Stack, Cloudinary, Websocket* **April 2025**

- Developed and implemented an alumni registration and profile management system that allowed users to input academic, career, and interest details, improving user engagement by 40%.
- Integrated the Razorpay payment gateway with JWT-based authentication and bcrypt encryption to secure alumni donations, streamlining transactions and achieving a 95% success rate.
- I Developed a job board module allowing alumni to post and explore career opportunities, fostering professional networking and increasing platform retention by 30%.
- Tech Stack: React.js, React-Redux, Tailwind CSS, Express.js, Node.js, JWT, bcrypt, MongoDB, Razorpay API.

TicketMate | *Full MERN Stack, Inngest, NodeMailer with Mailtrap, Agentkit by Inngest* **January 2025**

- Developed an AI-powered moderation system using the Google Gemini API to automate ticket categorization, priority assignment, and note generation, improving resolution time by 35% and reducing manual effort by 60%.
- Implemented a regex-based skill matching and intelligent routing system that automatically assigns tickets to the most qualified moderators, increasing efficiency by 25% and reducing misallocations.
- Tech Stack: React.js, Tailwind CSS, Express.js, Inngest (Agentkit), JWT, bcrypt, MongoDB, Nodemailer (Mailtrap), Google Gemini API.

Roboverse | *Full MERN Stack, Websocket* **October 2025**

- Built a real-time multi-client quiz engine using Node.js, Socket.io, and WebSocket, enabling instant state synchronization across admin and team dashboards with 50+ concurrent connections and 90% reduced event latency.
- Designed a live leaderboard using React.js and Redux Toolkit with sub-second score updates, secured via JWT and bcrypt role-based authentication to strictly separate Admin and Team interfaces.
- Tech Stack: React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, Socket.io, MongoDB, JWT, bcrypt.

Position of Responsibility

IEEE (Institute of Electrical and Electronics Engineers) **Spring 2024 – Present**
Web-Development Lead, Executive Member *MMMUT*

- Led a team of 13 developers to build and maintain society websites and web apps using [MERN Stack].
- Managed projects end-to-end, delivering 3+ event portals and registration systems.

Co-Ordinator **December 2024**
'TechSrijan' - The Annual Techno-Management fest of MMMUT, Gorakhpur

Achievements

- Smart India Hackathon (Team Lead)
- CodeChef: 1421 (max), Codeforces: 1034 (max), LeetCode: 160 (solved), InterviewBitz: 120 (solved)
